Professional Summary

Backend Software Developer specializing in building high-performance RESTful microservices, scalable database indexing, and multi-agent AI pipeline architectures. Proven expertise in Node.js, Express, MongoDB aggregation pipelines, caching systems, and containerized Linux deployment workflows.

Education

JIS University – B.Tech in Computer Science and Engineering (CGPA: 9.0)

Kolkata, West Bengal — 2022 – 2026

Experience

Management and Computer Consultants (MCC)

Sep. 2026 – Present

Trainee Software Developer

Kolkata, West Bengal

- Engaged in enterprise software development, database maintenance, and back-office API integrations.
- Optimized relational database queries, schema management, and back-end transaction workflows.
- Adhered to strict enterprise backend coding standards, API documentation, and integration testing.

Hansraj Ventures Pvt. Ltd.

May 2026 – Sep. 2026

MERN Stack Developer Intern

Remote / Hybrid

- Engineered scalable RESTful APIs in Node.js, Express.js, and MongoDB with Role-Based Access Control (RBAC).
- Optimized MongoDB aggregation pipelines and database indexing, reducing query response latency across services.
- Implemented JWT session validation middleware, security sanitization, and password encryption workflows.
- Configured production server builds using Nginx reverse proxies, PM2 process management, and Docker on VPS.

Projects

CodeSage | Node.js, Express.js, Groq (Llama-3), REST APIs, Node-Cache | [github.com/AnbCrafts/CodeSage](#)

2026

- Designed RESTful API endpoints in Node.js and Express to orchestrate Groq SDK (Llama-3) prompts for automated code analysis, Big-O calculation, and code trimming.
- Implemented Node-Cache in-memory caching to store previous query payloads, cutting redundant API calls and reducing server execution latency.
- Structured scalable server architecture with error-handling middleware, environment secret isolation, and optimized JSON serialization.

TrackForge | Node.js, Express.js, MongoDB, Socket.io, Gemini API, Cloudinary API, JWT | [github.com/AnbCrafts/TrackForge](#)

2026

- Built scalable REST APIs and WebSocket gateways using Node.js, Express, and Socket.io to power real-time chat, unread notifications, and ticket state synchronization.
- Engineered MongoDB aggregation pipelines for ticket analytics, role-based authorization, and automated AI skill-matching profile scoring.
- Implemented custom session security middleware, token replay prevention, and Cloudinary CORS proxy server streaming.

Nirman.AI | Node.js, Express.js, MongoDB, Gemini 2.5, SSE, Stripe API, JWT | [github.com/AnbCrafts/Website-Builder](#)

2026

- Orchestrated a 9-stage multi-agent backend pipeline with Google Gemini 2.5, sequentially managing product planning, code generation, and QA repair.
- Implemented Server-Sent Events (SSE) to stream real-time agent execution telemetry, logs, token counts, and step progress updates to client subscriptions.
- Built MongoDB database schemas for workspace clusters, versioned snapshots, and user access while managing Stripe webhooks and JWT middleware.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, C++, SQL, HTML5, CSS3

Backend & APIs: Node.js, Express.js, RESTful APIs, Socket.io, Server-Sent Events (SSE), RBAC, Microservices

Databases & Caching: MongoDB (Aggregation Pipelines, Indexing), MySQL, Relational Schema Design, Node-Cache

Cloud, DevOps & Security: Docker, Nginx Reverse Proxy, PM2, Linux/VPS Hosting, Git, GitHub, JWT, Postman

AI & Server Integrations: Google Gemini API (2.5), Groq SDK (Llama 3 / 3.3), OpenAI API, Cloudinary API, Stripe Webhooks

Certificates & Achievements

Full-Stack Web Development Certification: Ardent Computech Pvt. Ltd. (2025).

Java Programming Certification: NPTEL Certification, IIT Kharagpur (2024).

Hackathon Participation: Competed in Hack-O-Nova, a 36-hour inter-college hackathon at Adamas University (2024).
