Professional Summary

Database Developer & Data Platform Engineer specializing in relational and NoSQL schema design, database indexing, complex aggregation pipelines, and transaction isolation workflows. Strong foundation in ER modeling, normalization theory, query tuning, and backend data layer integration.

Education

JIS University – B.Tech in Computer Science and Engineering (CGPA: 9.0)

Kolkata, West Bengal — 2022 – 2026

Experience

Management and Computer Consultants (MCC)

Sep. 2026 – Present

Trainee Software Developer – Data Layer Focus

Kolkata, West Bengal

- Designed and optimized relational database schemas, ER diagrams, and back-end transaction workflows across 3+ enterprise client platforms.
- Tunable query optimization and index structuring, reducing transactional data retrieval latency by 25%.
- Implemented data validation rules, integrity constraints, and robust migration scripts ensuring ACID compliance.

Hansraj Ventures Pvt. Ltd.

May 2026 – Sep. 2026

MERN Stack Developer Intern – Database Focus

Remote / Hybrid

- Architected NoSQL data models and complex MongoDB aggregation pipelines for high-concurrency analytical operations supporting 1000+ daily active users.
- Optimized collection indexing strategies, reducing query response times by 30% across document databases.
- Engineered secure data access layers with atomic transaction execution and strict input validation pipelines.
- Managed production database persistence layers paired with containerized Node.js microservices on Linux VPS.

Projects

CodeSage | Node.js, Express, MongoDB, Node-Cache, Query Optimization | [github.com/AnbCrafts/CodeSage](#)

2026

- Designed relational schema models and document data structures for efficient storage and retrieval of code analysis payloads.
- Implemented in-memory caching layers (Node-Cache) alongside database indexing to cut redundant payload lookups by 40%.
- Structured clean database access patterns and optimized JSON serialization pipelines for high-throughput API endpoints.

TrackForge | Node.js, Express, MongoDB Aggregation Pipelines, Socket.io | [github.com/AnbCrafts/TrackForge](#)

2026

- Engineered advanced MongoDB aggregation frameworks to compute complex ticket analytics, team productivity metrics, and skill-matching scoring.
- Designed entity-relationship architectures and schema constraints for multi-project data partitioning and secure role-based access control.
- Implemented transactional workflows for ticket state synchronization and audit logging over real-time event streams.

Nirman.AI | Node.js, Express, MongoDB, Gemini 2.5 API, Stripe Webhooks | [github.com/AnbCrafts/Website-Builder](#)

2026

- Built robust database schemas for workspace clusters, version-controlled snapshots, and multi-agent execution telemetry logs.
- Managed transaction consistency for Stripe billing webhooks and user subscription persistence layers.
- Optimized data persistence models for 9-stage asynchronous multi-agent processing pipelines with zero data loss guarantees.

Technical Skills

Database Technologies: MongoDB (Aggregation Pipelines, Indexing, Sharding Concepts), MySQL, SQL

Database Design & Theory: Relational Schema Design, Normalization (1NF to BCNF), ER Diagram Modeling, ACID Properties

Transactions & Concurrency: Transaction Isolation Levels, Concurrency Control, Rollback Protocols, Atomic Operations

Backend Data Integration: Node.js, Express.js, RESTful APIs, Mongoose ODM, Node-Cache, Database Seeding

Tools & Environment: Git, GitHub, Linux/VPS Hosting, Postman, Docker, Environment Secret Isolation

Certificates & Achievements

Full-Stack Web Development Certification: Ardent Computech Pvt. Ltd. (2025).

Java Programming Certification: NPTEL Certification, IIT Kharagpur (2024).

Hackathon Participation: Competed in Hack-O-Nova, a 36-hour inter-college hackathon at Adamas University (2024).
